

The graph plots 'Days since start of study' on both the x and y axes. The x-axis ranges from 0 to 10 with increments of 2. The y-axis ranges from 0 to 10 with increments of 2. A single data series is plotted as a line with circular markers. The data points are approximately: (0, 0), (2, 0.5), (4, 1), (6, 2), (8, 4), and (10, 8). The curve shows a slow initial increase followed by a rapid upward trend starting around day 6.
